***Response to Election***

Applicant's election with traverse of Group I Claims 1-37 in Paper No. April 12 2004 is acknowledged. The traversal is on the ground(s) that there would not be undo searching required for Group II. This is not found persuasive because the non- elected Group II Claims 57-73 is in a different class/subclass.

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13, 14 , and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim S 13, 14, and 17 recites the limitations "same plane", "front" and "behind" in the body of the claims. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 11-14, 17-20 and 31-37 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Groner et al.(U.S.Pat.6,104,939). Groner discloses a method and apparatus for reflected image analysis that shows all the features of the claimed invention.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Groner in view of Ershov(U.S.Pat.6,137,821). Groner does not show explicitly the ratio of light reflected to light light transmitted. Ershov discloses a durable etalon based output coupler that shows a splitter that can transmit/reflect any portion of a light beam. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention use any ratio of reflected/transmitted as taught by Ershov so as to divert the needed light to a spectrometer.

Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Groner in view of Sevvick-Muraca et al.(U.S.Pat.5,865,754). Groner does not explicitly show pixelated detector. Sevvick-Muraca discloses a fluorescence imaging system and method that explicitly shows a pixelated detector. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a pixelated detector as taught by Sevvick-Muraca with the device of Groner because a pixelated detector can provide an acceptable input to a pixelated image display.

*Allowable Subject Matter*

Claims 15, 16, 21, and 23-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zeng, Chance, Mackinnon, Whitehead, Zeng'525, Lui, and Palic are cited to show structure similar to the claimed invention.
